

Supply Chain and Manufacturing Technologies

Koch Disruptive Technologies invests in transformative founders focused on manufacturing and logistics solutions related to labor challenges, cost and process efficiencies, technology advancements and other disruptive factors.

SUPPLY CHAIN

Autonomous Distribution

Software and hardware to deliver goods through minimal human touchpoints

Software

Technology that provides workflow automation and insight generation to solve problems and enable collaboration

MANUFACTURING

Process Automation

Software-driven capabilities that empower employees to pursue higher-value responsibilities and entrepreneurship

Digital Manufacturing

Innovations such as high-density robots and cobots, augmented reality and wearable devices, virtual reality, simulation tools and additive manufacturing technologies

SYSTEMS

Manufacturing Systems

Operation and business systems software to integrate new advancements

Industrial Connectivity

Solutions that allow design, manufacturing, maintenance and distribution facilities to network together (e.g., cloud infrastructure, AI/ML, cybersecurity)

The Added Value of Koch

As a worldwide manufacturer with strong logistics and IT capabilities, Koch Industries is at the center of the supply chain and manufacturing technology revolution.

- More than \$2 billion in managed freight (6th largest freight broker)
- 500 production facilities with 9,000+ engineers
- 9th largest dedicated fleet with 2,600+ trucks
- 1,000+ distribution centers worldwide
- Largest marine exporter of freight in the U.S.
- Class-leading, custom-built transportation management solution via KBX
- Ownership of Infor (3rd largest cloud-based enterprise resource planning system)
